Kynisk annoncetaktik på Facebook: Sådan kan sårbare unge rammes

Internt dokument afslører, hvordan Facebook vil gøre det nemmere for annoncører at overvåge kriseramte unge og få dem som kunder

Forbrugerrådet anmelder Google for at krænke retten til privatliv

Det er problematisk, at Google gemmer data om deres brugere i mange år, mener Forbrugerrådet, der har anmeldt virksomheden til Datatilsynet.

PÅ EN ALMINDELIG DAG

Ved hjælp af omkring 50 optegnelser foretaget på en helt almindelig dag, 12. september, er det muligt i hovedtræk at følge, hvor Ingeniørens journalist har befundet sig. Adresseerne henviser til masternes placering. For nogle master er der registreret mange tidspunkter, men vi har valgt kun at vise et enkelt klokkeslet for hver.

Snapchat advarer mod alternative apps

Det er stadig meget uklart hvad omfanget af Snapchat-sagen egentlig er. Nu klargør Snapchat at alle tredjeparts-apps er ulovlige.

| I have a surprise 😊

Snapchat advarer mod brugen af alternative Snapchat-apps. De overtræder Snapchats regler og gør brugerne sårbare. (© Snapchat)

Breaches you were pwned in

A "breach" is an incident where a site's data has been illegally accessed by hackers and then released publicly. Review the types of data that were compromised (email addresses, passwords, credit cards etc.) and take appropriate action, such as changing passwords.

Adobe: In October 2013, 153 million Adobe accounts were breached with each containing an internal ID, username, email, *encrypted* password and a password hint in plain text. The password cryptography was poorly done and many were quickly resolved back to plain text. The unencrypted hints also disclosed much about the passwords adding further to the risk that hundreds of millions of Adobe customers already faced.

Compromised data: Email addresses, Password hints, Passwords, Usernames

Dropbox: In mid-2012, Dropbox suffered a data breach which exposed the stored credentials of tens of millions of their customers. In August 2016, they forced password resets for customers they believed may be at risk. A large volume of data totalling over 68 million records was subsequently traded online and included email addresses and salted hashes of passwords (half of them SHA1, half of them bcrypt).

Compromised data: Email addresses, Passwords

'Hollywood hacker' who targeted Scarlett Johansson given 10 years in jail

Christopher Chaney, who hacked stars' online accounts, pleaded guilty to wiretapping and unauthorised access to a computer

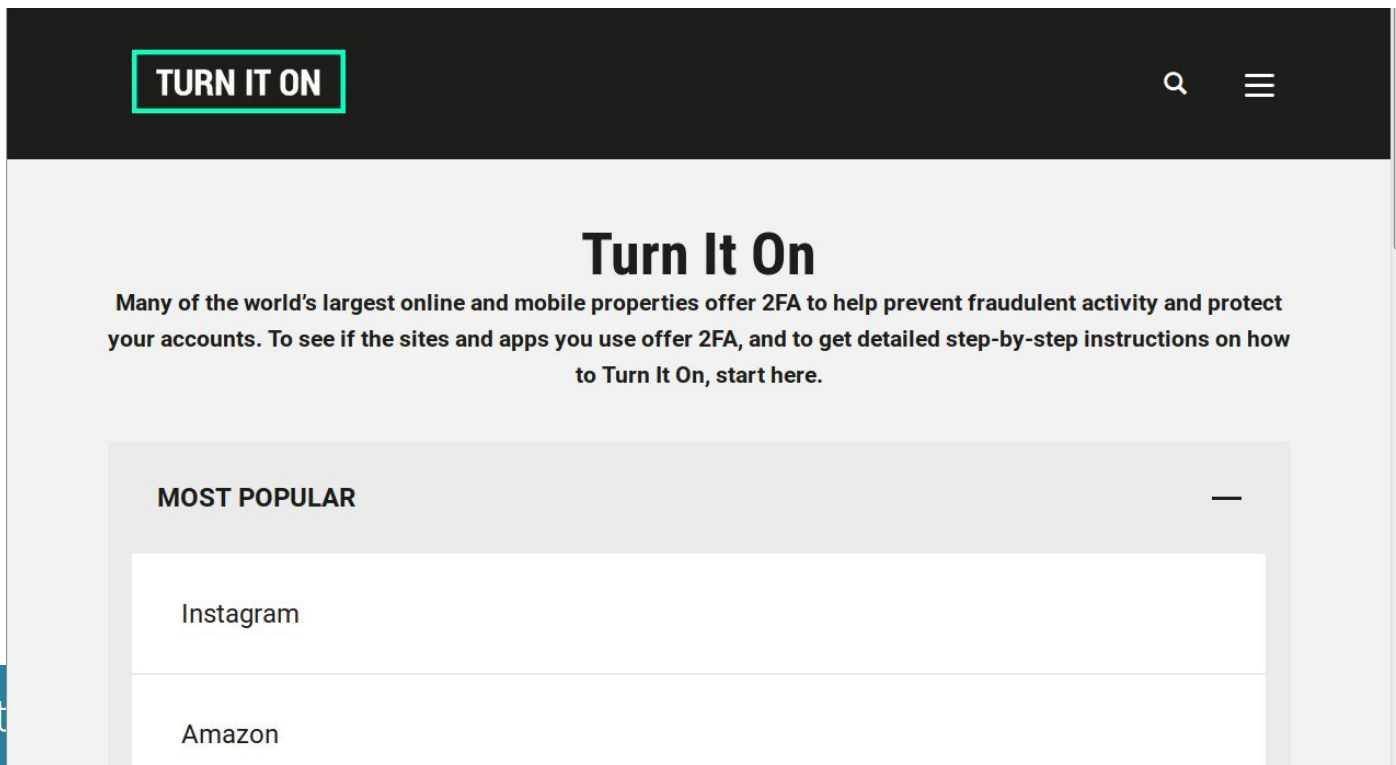

Prosecutors said Chaney illegally accessed the email accounts of more than 50 people in the entertainment industry. Photograph: Reed Saxon/AP

A federal judge on Monday sentenced a man who hacked into the personal online accounts of [Scarlett Johansson](#), Mila Kunis and other women to 10 years in prison.
